

Tray Lidding Superior Seal Integrity

We specialise in Tray lidding suitable for all meat, poultry, fish, vegetables and ready-made meal products. Our high performance peelable, lockup and aluminium tray lidding is available with a wide sealing range for all substrates and the option of our AM+ anti-mist layer for a much higher clarity.

Types of Lidding Films

Peelable Tray Lidding

- ARCPET® seals to APET, RPET & CPET
- Peelable hot and cold
- Self-venting which means there is no need to pierce the film

Lockup Tray Lidding

- Seals to A,R,C PET Trays
- Dual ovenable which means they can be used in a microwave and conventional oven
- Option of our permanent high performance anti-mist layer. Our coating does not interfere with seal integrity.

Aluminium Tray Lidding

- Superior seal integrity to all foil trays including I2R, Jenna and Nichil
- Strong peel and seal suitable for all fish, poultry, red meat and prepared meals
- Option of our permanent high performance anti-mist coating that does not interfere with seal integrity

Film Type	Tray Type	Printable	Peel Strength	Anti-Mist	Ovenable	Seal Integrity

M'steam® Diamond Retort The Convenient & Consistent Way to Steam Cook Food

Our Steam Cook Film for microwave and conventional ovens provides a perfectly controlled cooking environment to give you perfect results every time you cook. Our M'Steam® film is a laminated flexible packaging material designed to use as a steam release film with PP Tray and PA/PP lined thermoformed in microwave ovens. It is a low oxygen transmission film which maintains freshness for your product. Due to the multiple layers your printed artwork is secure and has no contact with the product or outside environment. Materials have been independently tested by Campden BRI for microwave cooking.

Key Benefits

- Excellent seal integrity / peelable after cooking
- No need to pierce film
- Packs on existing production lines e.g. Sealpac, Mondini, ProSeal, Pack Automation, Multivac.
- Hermetically sealed – unlike other Steam Film Applications M'Steam® maintains the barrier you require
- Reduces risk of cross contamination during cooking
- Steam cooking retains flavour and vitamins
- Printed version available
- Suitable for post pack pasteurisation
- Suitable for freezing to -22°C
