

Recycled Content Reel-Fed Film

Recycled Content Reel-Fed Films

Achieve your recycling targets using our PET, PE & OPP films with a range of pre & post consumer recycling content. Available for Form Fill & Seal, Sachets & Flow Wrap applications.

70% R-PET Recycled Content

We offer 70% **post consumer recycled content** R-PET film types in corona, metalised, heat sealable and peelable options. These R-PET films can easily replace your virgin PET film due to very similar characteristics, making them suitable for standard printing and lamination process.

Properties		Test Method	Unit	TFCO	TFCO-R7
Nominal Thickness		Polyplex Method	Micron	12	12
Tensile Strength	MD	ASTM D-882	KG /CM2	2200	1800
	TD			2300	2000
Elongation at Break	MD	ASTM D-882	%	130	130
	TD			125	120

30% & 50% PE Recycled Content

We also offer 30% and 50% **pre consumer recycled content** PE film types in clear and white. These pre consumer recycled content PE films can easily replace your existing PE films as they behave in the same way when printing and laminating.

30% OPP Recycled Content

We can supply OPP material with 30% of the raw material from circular and or bio-circular raw material.

- We have barrier properties for Light, Oxygen, Water, CO2 and Modified Atmosphere packaging (EVOH, PVOH, UV)
- High gloss & matt
- Choose from a variety of functional seals including; high bond seal integrity and peel & reclose options.
